In a recent review published in Nature Reviews Chemistry, Cronin group researchers describe how machine learning, coupled with real-time chemistry, is set to change the way chemists discover molecules, reactions and reactivity, as well as removing researcher bias.

### **Main Page**

When you perform your query, the data is read into memory in blocks. These blocks remain in memory but they get "aged". This means the blocks are tagged with the last access and when Sql Server requires another block for a new query and the memory cache is full, the least recently used block (the oldest) is kicked out of memory.
